In this post, we looked at how to organize Visual Studio projects by adding Solution Folders. These folders are virtual and can be nested, collapsed, expanded, and even hidden in the Solution Explorer. By adding Solution Folders, we can make it easier to focus on specific projects by hiding or scoping to folders.

~~Organizing Visual Studio Projects in Solution Folders ...~~

A solution is a structure for organizing projects in Visual Studio. The solution maintains the state information for projects in two files: .sln file (text-based, shared).suo file (binary, user-specific solution options)

You can either use mkdir or the Explorer to create new folders. Now, at the root folder of the solution, type in `git mv <source_folder> <destination_location>`. Before actually moving the folder, you can also add the `--dry-run` switch at the end to see what changes would be made and errors which might come (if any).

Folder To Solution Folder. Remove the hassle of adding several files to solution folder. Just use the context menu for the solution and just below the option of creating a new solution folder you now find 'Add Folder as Solution Folder'. This will create a solution folder with the same name as you selected and add the items inside of that folder to the solution folder.

Solution folders are just logical groupings of items. I don't think they relate to the file structure on your system. That is why you don't see them with a "Show hidden files" sort of functionality. You must right-click the solution, add a new folder, and then right click on the folder to add existing items or nested folders.

Solutions and projects aren't required to develop apps in Visual Studio. You can also just open a folder that contains code and start coding, building, and debugging. For example, if you clone a GitHub repo, it might not contain Visual Studio projects and solutions.

~~Introduction to projects and solutions – Visual Studio ...~~

You can delete solutions and their contents permanently, but not by using the Visual Studio IDE. Deleting items within Visual Studio only removes them from the current solution or project. To permanently delete a solution or other component from your system, use File Explorer to delete the folder that contains the .sln and .suo solution files. However, before permanently deleting a solution, it's recommended that you back up any projects or files in case you need them again.
